Riesling: The Noble One

with Paul Grieco

Riesling is one of the most cold-tolerant of the *Vitis vinifera* grape varieties, with the highest quality achieved in cooler growing conditions. No wonder this noble grape is suited to the northern vineyards of New York State. Riesling is also known for its ability to produce very different styles of wine, and New York is no exception, where the wines are made in a wide range of residual sugar profiles from bone dry to very sweet. Join Paul Grieco and a panel of exemplary Riesling producers as they explore this historic grape variety and deliciously refreshing, aromatic white wine.
